EDM

Environmental Data Management

| SCIENCE AND COMPLIANCE | Produced By: **Pollution Engineering**

SPONSORSHIP PROSPECTUS

Who Attends EDM?

- Site owners tasked with remediation and/or site compliance
- Consulting engineers responsible for a wide variety of environmental clean up and/or compliance issues
- Regulators interested in state-of-the-art data management systems

What is the Environmental Data Management Conference?

Environmental Data Management '09 (EDM '09) is a 1-1/2 day conference on environmental data management that will teach attendees how to properly manage and get the most from their scientific and compliance data adding profits to their bottom line.

Why Should I Participate?

The data you already have can be used to improve your profits... if you know how to handle them. This conference will show you how to better utilize the data you already have and how to capitalize on future data collection.
